

Nor-Clad[®]

~Limited~
**Lifetime
Warranty**
DURATECH[®] *x1*

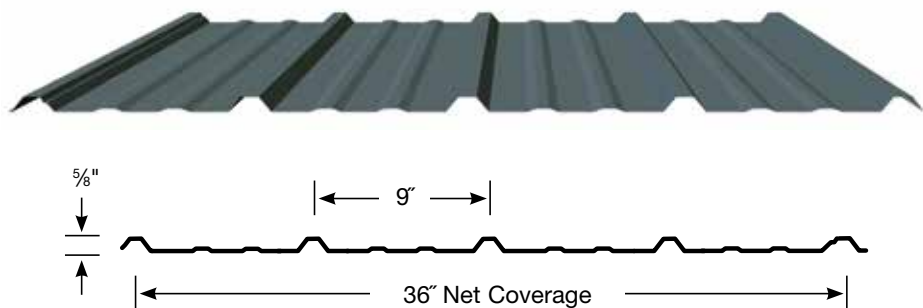

STANDING BY OUR PRODUCTS AND WARRANTIES FOR 40 YEARS

Nor-Clad is a light gauge, exposed fastener panel with 36" coverage used in residential roof and wall applications.

- Full 36" net coverage means fewer panels to handle and install, saving time and money.
- Available in our DuraTech *x1* paint system or our Zinalume Plus finish for unpainted applications; limited lifetime warranty available on residential applications.
- ColorGuard 25 with Spectrascape[®] available with a 25 year limited warranty for your agricultural, post frame and recreational building applications.
- Weather-resistant lap system with anti-siphon groove provides better weather tightness compared to most other light gauge, exposed fastener panels.
- Economical standard and custom trim packages available with every order.
- Nor -Clad panel assemblies are Class A Fire Rated when installed on non-combustible deck or framing per IBC or IRC. Nor -Clad panel assemblies are also Class A Fire Rated per UL790 when installed in accordance to UL listings.

COOL DuraTech® x/ keeps the heat out and the color brilliant.

- Superior color retention and resistance to chalk and fade.
- DuraTech x/ energy saving **COOL** colors reduce the demand for energy.

ColorGuard 25 with Spectrascape®

ColorGuard 25 with Spectrascape is a robust economical paint system offering a .2-.3 primer thickness with a nominal 1 mil total dry film thickness over a galvanized substrate on 29 gauge steel. This system sets the bar for chalk and fade with ratings similar to a PVDF. It is engineered to resist peeling or cracking for 25 years and is backed by a company who has stood behind their products and warranties for 40 years.

Not all colors and profiles are available at all locations. Please see availability chart for details. Colors are not representative. Contact ASCBP for actual color samples prior to purchase.

* ColorGuard 25 with Spectrascape Cool colors that meet a minimum .25 solar reflectivity.

Oil Canning

All flat metal surfaces can display waviness commonly referred to as "oil canning". "Oil canning" is an inherent characteristic of steel products, not a defect, and therefore is not a cause for panel rejection.
